

ASSESSING YOUR PATIENT POPULATION'S DISEASE BURDEN CAN'T BE A GUESSING GAME.

As medical groups move into performance based contracts, the ability to properly assess and document the disease burden of the population is essential for successful care management. Diagnosis codes assigned to patients are the basis of the actual risk or severity of illness of the population.

HIERARCHICAL CONDITION CATEGORY MODEL

MediSync's HCC Program trains physicians in the Medicare Hierarchical Condition Category model of risk adjustment. This model is used for Medicare Advantage plans, however most commercial risk or severity adjustment models use similar approaches.

With MediSync's HCC Program, physicians completely and accurately define ICD codes and learn to identify the medical conditions that increase risk adjustment.

This training program is designed as a clinical approach to coding and reimbursement. It starts with good documentation to support greater specificity reflected in the diagnosis codes.

WHAT MAKES MEDISYNC'S HCC PROGRAM UNIQUE?

- **Physician Training Physician On Site:** MediSync's HCC Program is taught by a physician and is designed as a clinical approach to coding and reimbursement.
- **Training Using Patient Data:** The training is individualized by using physician's patient data and clinical notes to teach good documentation that supports the level of specificity of the diagnosis codes.
- **Customized Reports Defining Action:** Customized reports enable the physicians to easily assess the greater level of specificity needed in the patient medical record.

READY TO ELEVATE YOUR MEDICAL GROUP?

Visit MediSync.com or give us a call at **844-801-1761** to see what we can do to take your group to the next level.

THE HCC PROGRAM'S ON SITE CORE CURRICULUM

Intro to the Hierarchical Condition Category Model

- Overview of HCC
- Financial impact of proper coding on RAF (Risk Adjustment Factor) scores
- Documentation required to support the codes

Impact on Individual Physicians

- Review the current, pre-training group and individual RAF scores
- Review of all diagnosis codes, by patient, for potential increased specificity.
- Review of patients not seen in the last year.
- Implementation suggestions for updating diagnosis codes and patient records.
- Progress Report for each patient.

ABOUT MEDISYNC

MediSync's expertise and sole focus is medical group performance. The medical group is at the forefront of healthcare transformation. MediSync has helped over 125 medical groups across the nation achieve their goals. With every short-term engagement or longer-term partnership, our unique and proven processes lead to desired results. We're proud of the great successes our clients have accomplished for themselves and their patients.

The HCC Program is one of several solutions that MediSync provides. It is intended to be used in conjunction with E&M CodeRight. Contact us to learn how our extensive service line offering can come together to help elevate your medical group performance.
